

# Hidden dangers

**M**ost of us take personal hygiene and that of our environment for granted. We forget the dangers from common bacteria that breed on high contact surfaces such as door handles, handrails and taps. More lethal is bacteria that thrive in public facilities like shopping malls (such as the trolleys we use), playgrounds and restaurants. Even if you clean your house every day, you only eliminate superficial dirt. Bacteria and mould continue to linger on high contact areas if not cleaned with anti-bacterial solutions frequently.

The cloth you use to clean could also actually be spreading the bacteria further.

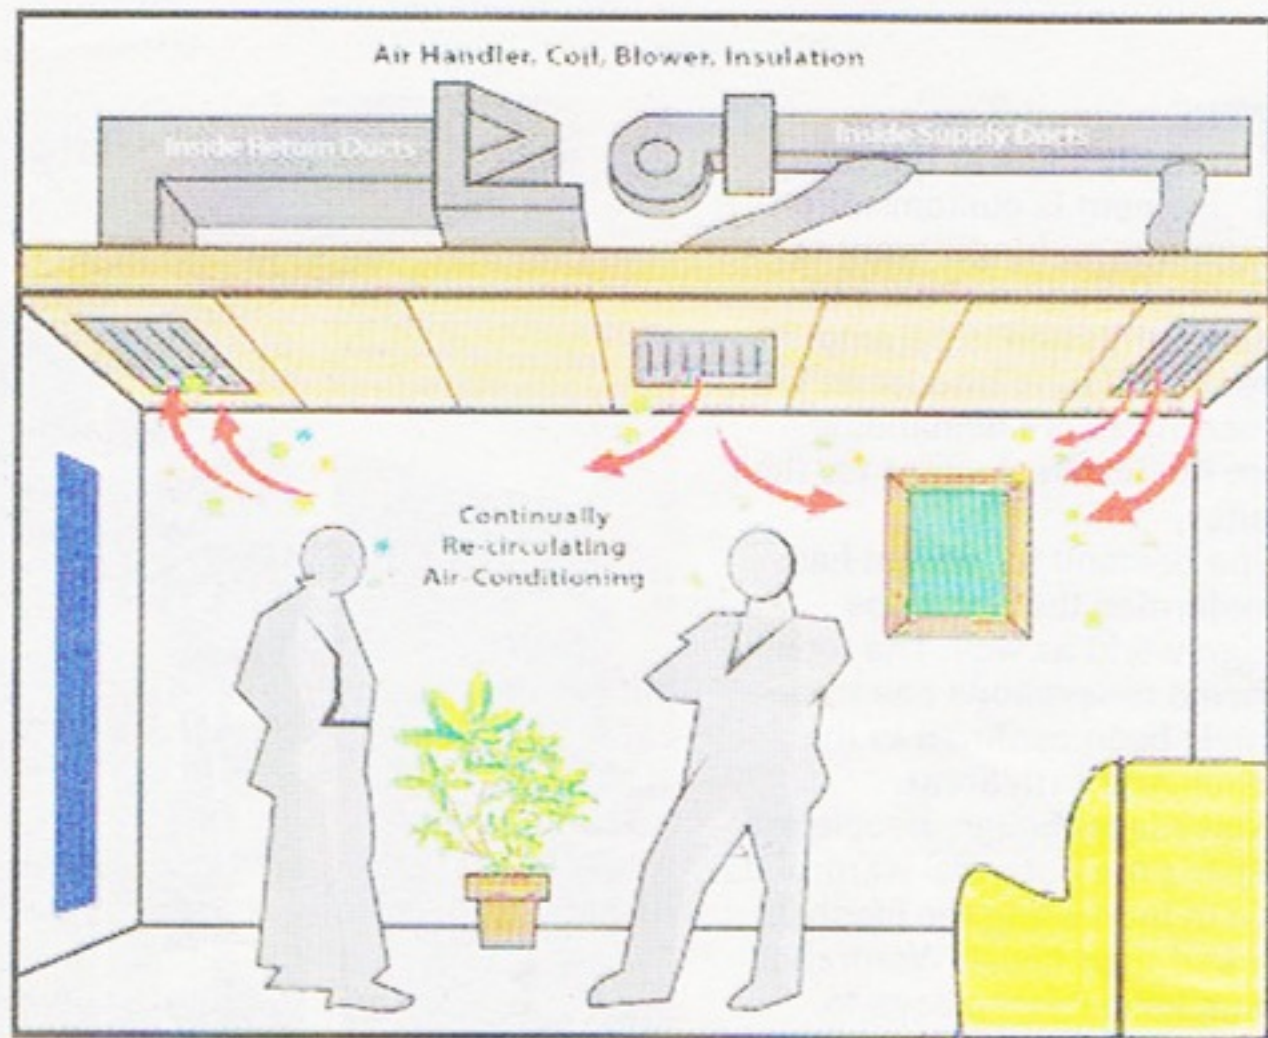

Bacteria and mould breeding inside your air conditioning systems are affecting the air you breathe daily. These pollutants in the re-circulating air expose you, your children, colleagues and clients to unhealthy air.

Through inhalation and ingestion, pathogenic bacteria can enter your body. As harmful bacteria reproduces, many emit toxins which damage the cells of the body, resulting in symptoms of bacteria-borne disease and other short and long term health problems.

## Introducing Bactakleen

Bactakleen is purportedly the world's first 2-in-1 anti-bacterial treatment system that effectively kills 99.9% of the bacteria and germs in your home, office, vehicles, school and shop using the best of today's technology from Japan and the United States.

This combination encompasses a specially designed fumigation device to atomise its concentrated anti-bacterial solution into an ultra

Bacteria and mould breed inside the recesses of your air conditioning systems.

fine mist made up of hundreds of millions of microscopic nano-sized cleaning particles, which can penetrate deeply virtually all areas of the ventilation system and even into bedding or vehicle interior, killing the bacteria and germs thriving in nooks and crannies.

For long-term protection against bacteria growth, Bactakleen sprays all high contact areas such as doorknobs, railings, faucet taps, steering wheels, switches and toilet flushes with its premium anti-bacterial coating.

Bactakleen offers you the following benefits: -

- \* Kills 99.9% of bacteria and mould
- \* Helps reduce the spread of airborne pollutants
- \* Improves air quality
- \* Neutralises bad odour
- \* Helps individuals with existing

respiratory conditions

- \* Removes build-up of bacteria colonies
- \* Safe, non-toxic and environmentally-safe
- \* Spray on anti-bacterial coating lasts over two years and is self cleaning
- \* Flexible and affordable application techniques to cater to your budget and needs
- \* Clinically test proven and insured

Bactakleen's revolutionary anti-bacterial treatment provides immediate, medium- or long-term protection against bacteria, mould and viruses. Find out more about Bactakleen today.
