

Protection against bacteria

ARE you worried about your children and loved ones picking up the flu or other diseases at school, or even at home? Bacteria and viruses are widespread on surfaces we touch every day.

The most contaminated surfaces are doorknobs, children's playgrounds, offices, restaurants, libraries, escalator handrails and shopping trolleys.

Touch any one of these surfaces, then rub your nose or mouth and you are at risk of infection.

Moreover, there is bacteria and mould breeding inside your air-conditioning system affecting the air you breathe in daily. The inhalation of such pathogenic bacteria into the body can result in symptoms of bacterial disease and other short- and long-term health problems.

Rather than just cleaning your house with domestic products, which only eliminate superficial dirt, there is now a revolutionary 2-in-1 anti-bacterial treatment system that provides you with immediate, medium and long-term protection against bacteria, mould and viruses.

Introducing Bactakleen

Bactakleen is a 2-in-1 anti-bacterial treatment system that effectively kills 99.9% of the bacteria and germs in your home, office, vehicles, school and shop using the best of today's technology from Japan and the United States.

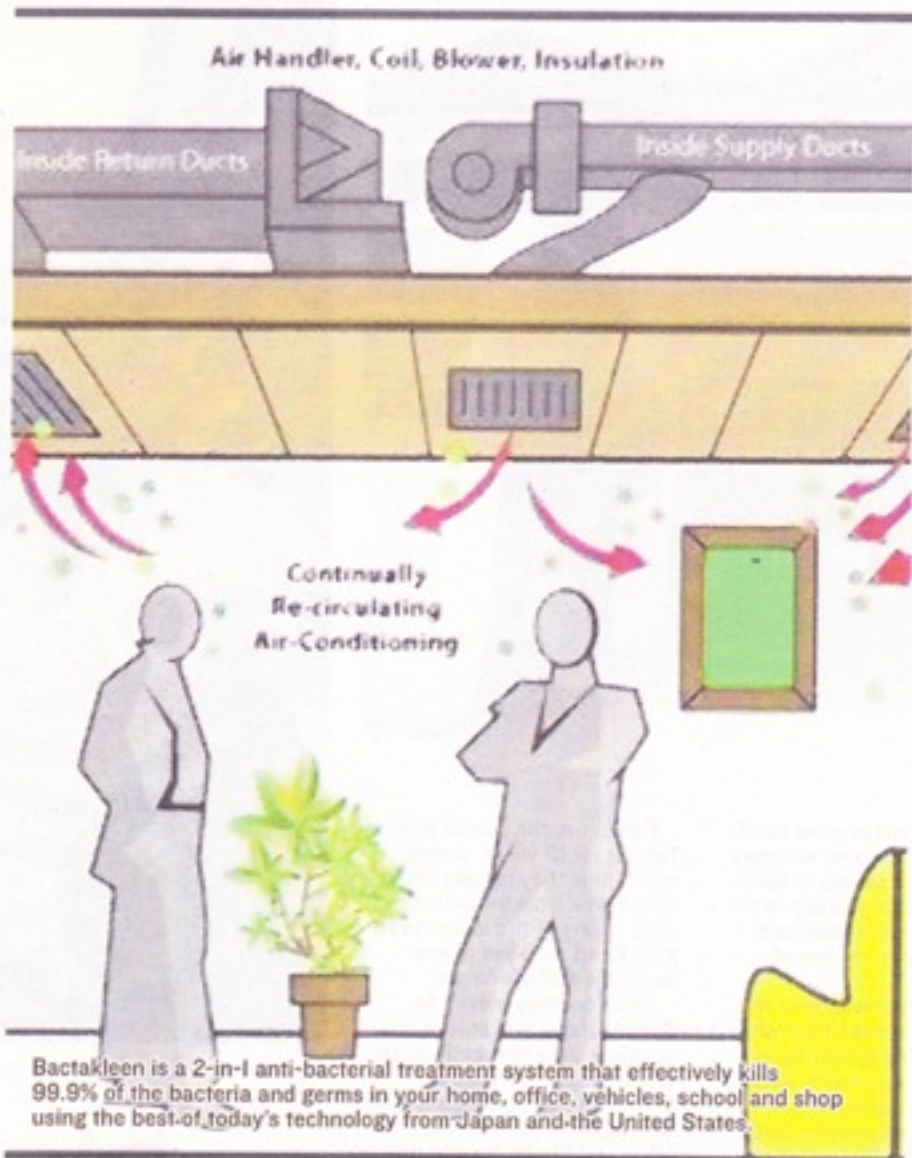

This combination encompasses a specially designed fumigation device to atomise the concentrated anti-bacterial solution into an ultra-fine mist made up of hundreds of millions of microscopic "nano-sized" cleaning particles.

It can penetrate virtually all areas of the ventilation system, including your home's bedding and vehicle's interior.

It kills the bacteria and germs thriving in nooks and crannies.

Bactakleen offers you the following benefits:

- Kills 99.9% of bacteria and mould
- Helps reduce the spread of air-borne pollutants
- Neutralises bad odour
- Helps individuals with existing respiratory conditions
- Removes build-up of bacteria colonies

- Safe, non-toxic and environmentally-safe
- Spray on anti-bacterial coating lasts over two years and is self-cleaning
- Flexible and affordable application techniques to cater to your budget and needs

- Clinically test proven and insured
- Don't take personal hygiene for granted.
